Tester Data Dashboard requirements

Datasets:
Test Logs 01

Analysis:

1. Time Period Question Based
2. Build/Version Analysis used to compare build performances
3. OPTIONAL
   DOMAIN Based Question (derived from query text) Score of the GDB answering model
   Also need to make sure we can know
   What type of questions can be easily answered?
   Which domains are with highest accuracy and speed and which aren't?
   Which domains have longest time?
   Which domains are error-prone?
   Which domains
4. Question Category Based too of previous Analysis.
5. Duration analysis (LIKELY UNNEEDED, But Dependency for other metrics)
   a. Automatic Response Time
   b. Author Duration
   c. Reviewer Duration
      i. 1
      ii. 2
      iii. 3
      iv. 4
      v. 5
   d. Moderator Duration
6. Together Used Metrics
   a. SLA Status based Counts
   b. Question in review model
   c. Question Correctly Framed
   d. Language(Origin/Trans)
   e. Trans Error Type
   f. Allocated to Reviewer?
   g. All Durations data
   h. Follow up Q in Review Model
   i. Expert Name Displayed
   j. Correct Expert name
   k. Source Links Provided
   l. 120 min message shown
   m. Notification
      i. Received
      ii. On same thread
      iii. Linked to Correct Q-ID
   n. Voice
      i. Input
      ii. Output
      iii. Issue Description
   o. Q answered correctly
      i. Weather
      ii. Mandi
      iii. Scheme
   p. Saved in DB
      i. Question
      ii. Answer
   q. Q-ID consistent across systems
   r. Whatsapp vs WebApp Answer matching
   s. Overall test status
   t. Defect Severity
   u. Reviewer Remarks not used
   v. Tester Remarks (might be used to calc smth)
7. Counts for Scientifically correct answers

Questions

- **Who is the primary user of this dashboard?**
  - Management
- **What decisions should someone be able to make after viewing it?**
  - **Analyse performance of GDB and current answering ecosystem**
- **How frequently is the test-log data updated?**
  -
- **How quickly should those updates appear on the dashboard—instantly, hourly, daily, or on refresh?**
  - **On Refresh**
- **Should the dashboard *only* display data, or should users also edit/update test logs from it?**
  - **Display Data**
- **What filters are important—tester, date, project, module, test status, severity, etc.?**
  - **All Categorical**
- **Do you want historical trends, such as pass/fail rate over time?**
  - **Needed, SLA approved or not**
- **Should users be able to download reports as Excel, CSV, or PDF?**
  - **PDF**
- **Where is the dashboard expected to run—locally, company server, or cloud?**
  - **Irrelevant**
- **Is there a preferred tech stack, or am I free to choose?**
  - **Node JS**
- **What does a successful first version/MVP look like?**
  - Able to filter based on all categoricals
  - All Scores should be seen and changeable based on the data being shown
- Should the Build Version be used for analysis?
- Imputation Rule:

Answered Questions against Rating, time

Values:

Test ID	Test Date	Tester Name	Type of Question	Build / Version	Sprint / Cycle	Channel Tested	Language Tested	Question ID	Query Text (Original)	Question Category	Time Question Asked (HH:MM:SS)	Time Answer Received (HH:MM:SS)	Response Time (mins) [Auto]	SLA Status	Question in Review Model?	Question Correctly Framed?	Original Language	Translated Language	Translation Quality	Translation Error Type	Tagging	Allocated to Reviewer?	Author's Name	Author Assignment Time	Author Completion Time	Author TAT (mins) [Auto]	Reviewer1 Name	Reviewer1 Assignment Time	Reviewer1 Completion Time	Review1 TAT (mins) [Auto]	Reviewer2 Name	Reviewer2 Assignment Time	Reviewer2 Completion Time	Review2 TAT (mins) [Auto]	Reviewer3 Name	Reviewer3 Assignment Time	Reviewer3 Completion Time	Review3 TAT (mins) [Auto]	Reviewer4 Name	Reviewer4 Assignment Time	Reviewer4 Completion Time	Review4 TAT (mins) [Auto]	Reviewer5 Name	Reviewer5 Assignment Time	Reviewer5 Completion Time	Review5 TAT (mins) [Auto]	Moderator's Name	Moderator Assignment Time	Moderator Completion Time	Moderator TAT (mins) [Auto]	Follow-up Q in Review Model?	Answer Scientifically Correct?	Expert Name Displayed?
N	Date	NC	C	Fixed	Fixed	C	C	N	NC	C	Time	Time	Duration	C	C	C	C	C	C	C	C	C	NC	Time	Time	Duration	NC	Time	Time	Duration	NC	Time	Time	Duration	NC	Time	Time	Duration	NC	Time	Time	Duration	NC	Time	Time	Duration	NC	Time	Time	Duration	C	C	C
N	Y	N	Y	Y	N	Y	Y	N	Might Use for domains	Same as Prev	D	D	D																																								

Questions:

1.

STEPS:

1. Formats need to be normalized.
2. Preprocessing
   Missing Value Mitigation

Test ID	Test Date	Tester Name	Type of Question	Build / Version	Sprint / Cycle	Channel Tested	Language Tested	Question ID	Query Text (Original)	Question Category	Time Question Asked (HH:MM:SS)	Time Answer Received (HH:MM:SS)	Response Time (mins) [Auto]	SLA Status	Question in Review Model?	Question Correctly Framed?	Original Language	Translated Language	Translation Quality	Translation Error Type	Tagging	Allocated to Reviewer?	Author's Name	Author Assignment Time	Author Completion Time	Author TAT (mins) [Auto]	Reviewer1 Name	Reviewer1 Assignment Time	Reviewer1 Completion Time	Review1 TAT (mins) [Auto]	Reviewer2 Name	Reviewer2 Assignment Time	Reviewer2 Completion Time	Review2 TAT (mins) [Auto]	Reviewer3 Name	Reviewer3 Assignment Time	Reviewer3 Completion Time	Review3 TAT (mins) [Auto]	Reviewer4 Name	Reviewer4 Assignment Time	Reviewer4 Completion Time	Review4 TAT (mins) [Auto]	Reviewer5 Name	Reviewer5 Assignment Time	Reviewer5 Completion Time	Review5 TAT (mins) [Auto]	Moderator's Name	Moderator Assignment Time	Moderator Completion Time	Moderator TAT (mins) [Auto]	Follow-up Q in Review Model?	Answer Scientifically Correct?	Expert Name Displayed?
NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA

3. Format Normalizing

TD:

1. Develop a Dashboard for easy analysis of available Tester Logs data
   a. For better decision making
2. DashBoard should Periodically fetch data from the google sheet and update itself.
3. Overall Executive KPI will be available for all layers.
4. Multiple Filters should be available.

Layered Approach:

1. Overall Quality

KPI	Meaning
Total Questions Tested	Test volume
Overall Pass Rate	Overall test status
Correct Answer Rate	Q answered correctly
Scientific Accuracy Rate	Scientifically correct answers
SLA Compliance Rate	SLA status
Translation Error Rate	Translation quality
Avg Response Time	Automatic response duration
Critical Defect Count	High severity problems

2. Time Period Analysis
   - Is system accuracy improving?
   - Is response speed improving?
   - Are defects increasing?
   - Did SLA compliance drop?
   - Did scientific correctness improve?
     - Charts
       Pass Rate ———————————— Time
       Accuracy ———————————— Time
       Avg Response Time ———————— Time
       Defect Count ———————————— Time
       Scientific Accuracy ———— Time

     Filters:
       Today
       Last 7 Days
       Last 30 Days
       Custom Date Range
3. Build/Version Analysis (INSUFFICIENT DATA)
4. Domain + Question Category Analysis
5. Test Component / Failure Analysis

Group	Metrics
Question Quality	Correctly framed, Follow-up Q
Answer Quality	Correct answer, Scientific correctness
Workflow	SLA, Review model, Reviewer allocated
Translation	Language, Translation error type
Expert	Name displayed, Correct expert
Sources	Source links provided
Notification	Received, Same thread, Correct Q-ID
Voice	Input, Output, Issue description
Database	Question saved, Answer saved
Consistency	Q-ID consistency
Platform	WhatsApp vs WebApp matching
Defects	Overall status, Severity

Final Summarized

Translation Failure	28%
Notification Failure	19%
Answer Accuracy	17%
Q-ID Consistency	14%
Voice Issues	12%
Database Issues	10%

Executive KPI	Mapped Spreadsheet Columns
ACE TRUST SCORE	Answer Scientifically Correct?, Correct Expert Name?, Expert Name Displayed?, Source Links Provided?, Translation Quality, Weather Q Answered Correctly?, Mandi Price Q Correct?, Scheme Q Correct?, WhatsApp vs Web Answer Match?, Question Correctly Framed?
FARMER EXPERIENCE SCORE	Response Time (mins) [Auto], SLA Status, Question Correctly Framed?, Translation Quality, Voice Input Working?, Voice Output Working?, Voice Input Quality, Voice Output Quality, Notification Received?, Notification on Same Thread?, Notification Linked Correct Q-ID?, 120-min Msg Shown to User?
CRITICAL FAILURES TODAY	Answer Scientifically Correct?, Weather Q Answered Correctly?, Mandi Price Q Correct?, Scheme Q Correct?, Question Saved in DB?, Answer Saved in DB?, Q-ID Consistent Across Systems?, Notification Linked Correct Q-ID?, Defect Severity
RELEASE HEALTH	Overall Test Status, Defect Severity, Status, Build / Version, Sprint / Cycle, Question Saved in DB?, Answer Saved in DB?, Q-ID Consistent Across Systems?
BIGGEST BOTTLENECK	Author TAT, Review1 TAT, Review2 TAT, Review3 TAT, Review4 TAT, Review5 TAT, Moderator TAT
WEAKEST MODULE	Weather Q Answered Correctly?, Mandi Price Q Correct?, Scheme Q Correct?, Translation Quality, Voice Input Quality, Voice Output Quality
TREND	Trust Score trend, Farmer Experience trend, Response Time trend, Defect trend, Review TAT trend

Data Dictionary

Column Name	Type	Example Values	Purpose
Test ID	String	TST-001	Unique test record
Build / Version	String	v2.3.1	Release tracking
Response Time (mins) [Auto]	Numeric	2.5	Performance
Answer Scientifically Correct?	Boolean	Yes/No	Accuracy validation
Defect Severity	Enum	Critical/High/Medium/Low	Risk classification
Overall Test Status	Enum	Pass/Fail	Release decision

KPI	Formula Logic
ACE TRUST SCORE	40% Scientific Accuracy + 20% Domain Accuracy + 10% Source Links + 10% Expert Accuracy + 10% Translation Quality + 10% Cross Channel Consistency
FARMER EXPERIENCE SCORE	30% Response Speed + 20% SLA + 20% Voice + 15% Translation + 15% Notification Experience
CRITICAL FAILURES TODAY	Count of all critical failures across scientific, DB and notification validations
RELEASE HEALTH	Pass Rate - Critical Defects - Data Integrity Failures
BIGGEST BOTTLENECK	Stage with highest average TAT
WEAKEST MODULE	Module with lowest accuracy percentage
TREND	Comparison against previous build or sprint

Filters
